

Aarav Kulkarni

Final-year Artificial Intelligence and Machine Learning undergraduate with the strongest direct evidence against the target Junior AI/ML Engineer role. Combines high academic performance, Python and ML fundamentals, two relevant internships, research exposure, production-style API work, Git, model evaluation and measurable project outcomes. Based in Mumbai and fully available for the required hybrid schedule.

EDUCATION

2023–2027
CGPA: 9.12/10

B.Tech Artificial Intelligence & Machine Learning
Mumbai Institute of Technology, Mumbai
Relevant: Python, Data Structures & Algorithms, Statistics, ML, DBMS, Deep Learning, NLP, MLOps.

2023
Percentage: 94.20%

Higher Secondary (XII)
Maharashtra State Board
Evidence: official result.

2021
Percentage: 96.10%

Secondary (X)
Maharashtra State Board
Evidence: official result.

EXPERIENCE

May 2026 – Jul 2026

Machine Learning Engineering Intern
NovaData Labs, Mumbai

- Built reusable Python preprocessing utilities for tabular and text datasets under senior ML-engineer review.
- Implemented baseline classification and regression workflows with scikit-learn and compared models using precision, recall, F1, MAE and RMSE.
- Created experiment logs containing dataset version, parameters, metrics and conclusions so results could be reproduced.
- Assisted in exposing a trained model through a lightweight Flask API and tested request/response behavior.
- Participated in code reviews and weekly technical presentations.
- Evidence: internship certificate, mentor evaluation, Git commits and experiment reports.

Jan 2026 – Apr 2026

AI Research Assistant
AIML Research Cell, Mumbai Institute of Technology

- Prepared and cleaned more than 8,000 text records for a sentiment-analysis experiment.
- Performed tokenization, train/test splitting, baseline modeling and error analysis.
- Compared model performance and documented why one approach was preferred over another.
- Presented findings to faculty and maintained versioned experiment notes.
- Evidence: faculty letter, research notebook and reviewed result sheet.

ACADEMIC COURSEWORK

- Python Programming
- Data Structures & Algorithms
- Machine Learning
- Statistics & Probability
- Database Management Systems
- Deep Learning
- Natural Language Processing
- MLOps Fundamentals

TECHNICAL SKILLS

- Python
- pandas / NumPy
- scikit-learn
- SQL
- Git / GitHub
- Flask / REST APIs
- Model Evaluation
- Data Cleaning
- Jupyter

SOFT SKILLS

- Technical communication
- Problem solving
- Teamwork
- Attention to detail
- Documentation
- Learning agility

INTERESTS

AI research, Violin, Reading technology and science books

PROJECTS

- Fraud Detection Pipeline**
Built an end-to-end classification workflow for detecting potentially fraudulent transactions.
Technical stack: Python, pandas, NumPy, scikit-learn, SQL, Git.
Evidence: Evidence: handled missing values and class imbalance, engineered features, compared four classifiers and selected the final model using F1 and recall. The report contains confusion matrices and experiment logs.
- Resume Screening Prototype**
Developed a text-classification prototype that categorizes resumes against role requirements.
Technical stack: Python, pandas, TF-IDF, scikit-learn, Flask.
Evidence: Evidence: implemented text cleaning, feature extraction, similarity scoring and a simple API endpoint. Test cases and sample outputs are documented in the repository.
- Demand Forecasting Study**
Compared baseline and tree-based regression models for weekly demand prediction.
Technical stack: Python, pandas, scikit-learn, matplotlib.
Evidence: Evidence: used chronological train/test separation and evaluated models using MAE and RMSE. Final report documents model selection and error observations.

CERTIFICATIONS

- Machine Learning Specialization — Coursera, 2026. Evidence: graded assessments and completion certificate.
- Python for Data Science — IBM, 2025. Evidence: certificate and practical exercises.
- Google Cloud Generative AI learning credential, 2026. Evidence: digital completion record.

ACHIEVEMENTS

- Department Rank 2 with 9.12/10 CGPA.
- Winner, Inter-College Applied ML Challenge among 42 teams.
- Selected for a faculty research presentation on sentiment analysis.
- Internship mentor rated technical documentation and model evaluation as outstanding.

LOCATION & WORK MODE

Mumbai, Maharashtra, India. Candidate currently studies in Mumbai and explicitly confirms availability for at least three office days per week.

JD MATCH ASSESSMENT

BESTEST MATCH: Meets every core JD requirement with unusually strong direct evidence. Has relevant education, Python, ML, data handling, algorithms, projects, certifications, two practical experiences, Git/API exposure, communication evidence and Mumbai hybrid availability. No stated deal breaker.

EVIDENCE SUMMARY

Evidence is traceable to academic records, internship certificates, mentor evaluation, Git repositories, project reports, research notebooks, certificates and competition records.

DATASET PURPOSE

This resume is intentionally calibrated to a specific quality tier for the same Junior AI/ML Engineer job description. The candidate profile is not merely shorter or longer: the education, skills, experience, projects, evidence quality, and constraint fit are changed so that the four resumes represent clearly different levels of suitability.
